

Muneeb ur Rehman

AI Engineer | Full-Stack Developer

Pakistan | muneebxaiengineer@gmail.com | 03369613152 | GitHub: <https://github.com/muneebraja001/>

PROFESSIONAL SUMMARY

A motivated Computer Science (AI) Fresh graduate with hands-on experience in Full-Stack Development, Machine Learning, and AI Generation. Proficient in building end-to-end AI applications from responsive frontends (React.js) to scalable backends (Python, Flask, FastAPI). Skilled in Computer Vision (YOLO, OpenCV, DeepFace), LLM integration (OpenAI, Claude, Gemini), and RAG pipelines. Basics of cloud deployment (AWS, Azure, GCP). Passionate about writing clean, production-ready code and solving real-world problems through technology.

WORK EXPERIENCE

AlphaOrigin SMC PTV Limited — Junior Web Developer (Frontend) June 29, 2026 – Present

- Developing and maintaining responsive web applications using React.js, Tailwind CSS, and Bootstrap
- Building reusable UI components with modern frontend technologies to ensure scalability and performance
- Collaborating with design and backend teams to implement pixel-perfect, user-friendly interfaces
- Translating Figma/Adobe XD designs into high-quality, production-ready code
- Participating in daily stand-ups, sprint planning, and code reviews in an Agile development environment
- Continuously learning and applying new frontend tools and best practices to improve development workflow

Dione PTV Limited — AI Intern July 15, 2025 – September 15, 2025 (2 Months)

- Developed practical expertise in Computer Vision using YOLO and OpenCV
 - Contributed to a drone-based vision system for real-time object detection
 - Performed NLP preprocessing including tokenization, cleaning, and data preparation
 - Collaborated on real-world AI projects under professional supervision
 - Enhanced skills in model training and dataset preparation for image and text-based ML models
-

EDUCATION

PROJECTS

Missing Children Detection System (Final Year Project)

- A full-stack web app where users can report missing/found children with AI-powered face recognition.
- Area Technologies
- Frontend React.js, HTML5, CSS, JavaScript – responsive UI/UX
- Backend Flask RESTful API (Python) – image handling, matching logic, notifications
- Database SQL Server, – child records, user reports, match history
- AI Integration DeepFace (Facenet) for face matching;
- Features Real-time alerts, role-based access (Police, Edhi, foster, adoption, finder, Reporter)

Grocery Store Management System (Full-Stack Project)

- Built a complete grocery store system with product management, sales, and bill generation.
- Frontend: React.js with Tailwind CSS – responsive product catalog, cart, checkout
- Backend: Flask REST API – product CRUD, order processing, bill generation
- Database: MySQL – products, categories, orders, sales records
- Features: Add/update products, generate customer bills, track daily sales
- UI/UX: Designed in Figma with clean, user-friendly interface

Real-Time Object Detection & Counting (Computer Vision)

- Built a vehicle detection and counting system for CCTV footage using CSRT tracker.
- Implemented YOLOv8 for object detection on video frames
- Used CSRT tracker to track cars and count total vehicles in footage
- Preprocessed videos with OpenCV and extracted frame-by-frame analysis
- Built a simple FastAPI endpoint to serve predictions – tested with Postman

Image Classification with CNN (Deep Learning)

- Trained a Convolutional Neural Network (CNN) for image classification using TensorFlow/Keras.
 - Built and trained a CNN model on custom image dataset
 - Performed data augmentation to improve model generalization
 - Achieved 85% accuracy on test data
 - Deployed as a Flask API for real-time predictions
-

TECHNICAL SKILLS

Category	Skills
• Frontend	React.js , HTML5, CSS3, JavaScript, Tailwind CSS
• UI/UX Design	Figma, Visily, Canva, Prototyping
• Backend	Python, Flask, FastAPI, Django (basic)
• API & Integration	REST APIs, OpenAI API
• Databases	SQL Server, MySQL, MongoDB, Prisma ORM
• AI/ML & CV	YOLOv8, OpenCV, DeepFace ,TensorFlow, scikit-learn, Pandas, NumPy
• LLM & Generative AI	RAG Pipelines, LangChain, Prompt Engineering , Gemini
• Chatbot Development	OpenAI API, Claude API, Basic chatbot integration
• Cloud	AWS , Azure ,GCP (basic)
• Tools	Git, GitHub, Postman, VS Code, Jupyter, Google Colab

CERTIFICATIONS

• Azure: Create a Virtual Machine and Deploy a Web Server	Coursera 2026
• Introduction to Prompt Engineering with GitHub Copilot	Microsoft / SimpliLearn 2026
• Freelancing Course	E-Learning Mianwali 2022

ADDITIONAL INFORMATION

- Available for full-time onsite role in Islamabad/Rawalpindi
- Quick learner with adaptability to new tools and technologies
- Strong communication and teamwork skills
